Introduction

The thrust area of Sociology General syllabus on 'Society in India' module of West Bengal State

University has been Family Studies. In line with these objectives, The Department of Sociology,

Bamanpukur Humayun Kabir Mahavidyalaya decided to organize a student seminar on the topic

'Family in India' on 29.11.2022 from 1p.m. -3 p.m. at the Seminar Hall. For the seminar,

however, only those areas of family problems were selected which are faced by a

sizeable number of families, but are not universally prevalent. Although the seminar

focused on problems, it used a mixture of remedial and preventive themes because,

while reviewing research on these problems, their etiologies were also examined

which gave indications for prevention.

Four areas of family problems were selected and defined for presentations in the student seminar.

These were problem situations that were found to have led to various problems of individual and

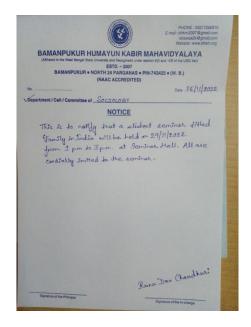

family disintegration, destitution and deviation especially among children and women. The areas

selected were, family structure and problems, families in crises, families with marital problems, and

abuse and violence in families. These were different entry points to analyse the dynamics of families

with problems and are, therefore, not mutually exclusive.
