Introduction:

World Environment Day is celebrated annually on 5 June and encourages awareness and action for the protection of the environment. It is supported by many non-governmental organizations, businesses, government entities, and represents the primary United Nations outreach day supporting the environment. The first major conference on environmental issues was held in the year 1972 from June 5-16 in Stockholm (Sweden). Later that year, on December 15, the General Assembly adopted a resolution designating June 5 as World Environment Day. In 1974, the first World Environment Day was celebrated. Since then, World Environment Day is celebrated every year on June 5, engaging governments, businesses, celebrities and citizens to focus their efforts on a pressing environmental issue. World Environment Day is an occasion to think about how we are a part of nature and how intimately and unequivocally we depend on it for survival.
